SIROLaser Advance

THE GENTLE DENTAL THERAPY.

"Is Laser Treatment right for you?"

Subject to technical changes and errors in the text, Order No. A91100-M45-B225-01-7600, Printed in Germany, Dispo No. 04603, WS0413XV1

LESS DISCOMFORT.

Comfortable, gentle and fast healing laser therapy with the SIROLaser Advance:

- Reduction of inflammation
- Most procedures require little to no anaesthetic
- Reduced need for additional and costly treatments
- Prevents unpleasant pressure, noise and vibrations

With SIROLaser Advance, there is no reason to be afraid of treatment – Feel relaxed during your dentist visit!

MUCH FASTER RECOVERY.

Laser therapy with SIROLaser Advance helps to speed up your recovery from numerous procedures, e.g.:

- Frenectomies (tissue reduction) of the lips and tongue are performed with less bleeding, higher comfort, with little to no sutures and in a fraction of the time when compared to conventional methods.
- In Periodontitis (gum disease) – The inflammatory processes in affected gingival pockets are minimized gently, reliably and safely with SIROLaser Advance!
- In Endodontics – Inflammation in the root canal is minimized – so softly that you won't even notice it!
- Treatment of aphthous ulcer (canker sore) can be done systematically and gentle resulting in improved healing.

And also herpetic lesions and aphthae can be treated systematically to achieve fast relief for you.
